To Log on go to:  www.clippcases.org
You should have been emailed your username login and password to your university
email account prior to beginning your pediatric rotation.  Your username and password
come in two separate emails.
NOTE: If you have not received your username and password you may create your own.
Please note: if you are registering for a new username and password be sure to use your
University of Utah email address.  Type “3rd year medical student” for position.

• You are expected to complete 28 cases during the 6 week pediatric clerkship.
• Each case takes approximately 45 minutes to 1 hour to complete.
• You may work through the cases individually or in groups.
• At the end of each case is an evaluation which you are encouraged to complete.
• At the end of the clerkship you will be required to print off your “case selection”
  page to get credit for completing the cases.
• Prior to the final exam you be asked to complete a voluntary survey evaluating
  how these cases contributed to your learning experience during this rotation.
• Completion of the CLIPP cases accounts for 10% of your clerkship grade.
• The CLIPP Final exam will be administered during the last week of the rotation,
  and accounts for 10% of your clerkship grade.

• Case Assignments: (All cases except #6, 24, and 28.) Work through the cases in
  any order, this is only a suggested outline.  You may modify the order of cases
  based on your clinical schedule.
  Week 1:  5 Cases 1, 7, 8, 9, 26
  Week 2:  5 Cases 2, 3, 18, 16, 31
  Week 3:  5 Cases 10, 11, 17, 19, 23
  Week 4:  5 Cases 4, 5, 12, 13, 14
  Week 5:  5 Cases 15, 21, 22, 27, 20
  Week 6:  3 Cases 25, 29, 30

• Some of the Pediatric Didactic Lectures may be facilitated discussions around
  concepts and objectives addressed in some of the cases. In general, note that the
  following cases are pertinent to the areas listed and you may wish to review these
  cases prior to lectures or clinical time in this area.
  ✓ Newborn Issues (Cases 1, 7, 8, 9)
  ✓ Fever in the Pediatric Patient (Cases 10, 11, 19, 23)
  ✓ Pulmonary (Cases 12, 13),
  ✓ ENT/ Upper Respiratory (Cases 13, 14)
  ✓ Pediatric GI Issues (Cases 15, 22, 27)
  ✓ Well Child Care and Health Maintenance (Case 1,2,3,4,5)
