VEASY AND ANDERSON INTERN GUIDELINES
CONCERNING MEDICAL STUDENTS

Patient Care
1. Students are assigned in-hospital call every fourth night with a mentoring intern. 
   It is your responsibility to include them in all that goes on, including cross-
   cover on the student’s patients during call nights.

2. Students should aim at seeing four to six admissions per week.

3. The junior medical student should be the first person to see their assigned 
   patients upon admission to the hospital. The houseofficer(s) may occasionally 
   be with the student during the initial patient work-up if this helps with timing. 
   However, this should be viewed as an educational opportunity for the student and 
   constructive feedback on their H&P skills should subsequently be given by the 
   houseofficer(s).

4. Students will write the official chart H&P on all patients they work up. The intern 
   and resident should review this H&P with them and co-sign it. The student should 
   be encouraged to expand areas of the history and physical onto progress note paper 
   as needed i.e. HPI, Social History, Family Tree, Differential Diagnosis, 
   Assessment and plan.

5. Medical students will see the patients assigned to them before work rounds in the 
   morning and will present their patients on work rounds.

6. The students will write daily progress notes on the charts of their patients. These 
   should be read and co-signed by the intern. These notes need not be completed 
   before work rounds.

Conferences
1. Attendance is expected at all conferences on the ward schedule, but there is some 
   flexibility if other patient care activities are going on. The houseofficers and 
   students should decide together which is more important.

2. The students Pediatric Teaching Sessions occur on Wednesday afternoons (Topics 
   in Medicine). The students are required to attend.

Evaluations
1. If problems with a particular student are identified, please speak with your senior 
   resident and/or contact Dr. Chris Maloney (ext. 3283 or pager 914-6689) or Dr. 
   Venus Wilke early in the rotation so that they can help you find a solution.

2. An official evaluation session will be held during week three of the student’s 
   rotation. Intern attendance is not required, but you are encouraged to give your 
   feedback to the senior resident on your team.
