2016 Professional Development Classes
Open for Registration!

It is an honor for us to be able to learn from and with you, and we’re looking forward to your participation in the 2016 class series. We’re excited about the lineup of classes this year and hope you’ll find them useful and enjoyable. The online registration system is now open:

Peds Intranet > General Information > Staff Professional Development Program

Characteristics of Intelligent Behavior

1. Persistence: not giving up when the solution to a problem is not readily apparent
2. Decreased Impulsivity: thinking before speaking or doing
3. Flexibility in Thinking: considering other options and points of view
4. Metacognition: being aware of your own thinking; knowing what’s going on in your head
5. Precision of Language and Thought: using descriptive terms to communicate more precisely
6. Curiosity: living with a sense of wonderment and inquisitiveness
7. Creativity: using your ingenuity, originality, and insight to generate clever solutions and techniques
8. Accuracy and Precision: not letting speed or ease surpass your desire for quality
9. Cooperation: taking advantage of the thinking and learning that can only come as a result of social relationships

Lifelong learning is like a never-ending personal revolution.
- Bryant McGill

Outlook Quick Tip

You can create a new message or calendar appointment from your clipboard. Copy any text (ctrl-c) to your clipboard. It can be from another message, a Word document, an Excel spreadsheet, a website, whatever! Then in Outlook, press ctrl-v (a message needs to be selected; any message will do). A brand new message opens up with your text already pasted in it. Or click on a time slot in the calendar, press ctrl-v, and a new appointment opens with the text in the body. Amazing, right? You’re welcome.
