Who can use Coordinated Scheduling?

Coordinated Scheduling is for patients and families who have 3 or more appointments that they would like coordinated during their visit to Primary Children’s Hospital.

How does Coordinated Scheduling work?

Scheduling specialists will verify appointment needs and availability with the parent/guardian. They will make every effort to coordinate appointments in a short period of time (i.e. 4 appointments over 1 or 2 days).

What types of appointments can be coordinated?

- Clinic appointments and surgical consultations with physicians at Primary Children’s.
- Imaging tests at Primary Children’s.
  (i.e. MRI, CT, X-ray, etc.)
- Diagnostic tests at Primary Children’s.
  (i.e. PFT, EEG, EKG, Echo, etc.)

What types of appointments cannot be coordinated?

- Procedures and surgeries.

Our scheduling specialists are available to answer questions regarding which types of appointments can and cannot be coordinated.
