

Department of Pediatrics Faculty Online Clinical Profile

INSTRUCTIONS FOR YOUR CLINICAL BIOGRAPHY

- This section should be short, no more than 3-5 sentences.
- Give an overview of what separates you from other physicians, for example, your specialties or areas of research focus that apply to your clinical practice.
Example: "Dr. Smith is a dermatologist who focuses on the diagnosis and treatment of skin cancer. He is an expert on Mohs Surgery, having performed more than 300 procedures."
- Use patient-friendly language and avoid jargon or confusing clinical terms. For example don't say "treatment modalities" but instead say "treatment options."
- Remember this is one of the most searched sections of our website. This is where many potential patients decide on booking an appointment so it's important to be concise and clear about your practice, expertise, and area of focus.
- To obtain the best search engine results, key words and phrases matter and should be mentioned in your first or second sentences.

Sample Clinical Biographies

Dr. _____ received her medical degree from _____ University Faculty of Medicine, completed her Pediatric residency at _____ Children's Hospital, and her Neonatology Fellowship at _____ University. She was on the faculty of the Medical College of _____ and then in private practice in pediatrics for 12 years. She then received additional training in Medical Acupuncture through _____ School of Medicine. Dr. _____ is board-certified in Pediatrics and Medical Acupuncture.

She is currently an Assistant Professor of Pediatrics at the University of Utah and is in the Division of Inpatient Medicine at Primary Children's Medical Center. As the Medical Director of the Pediatric Integrative Medicine Program, her specific clinical interests are in combining complementary healing approaches with traditional allopathic medicine to relieve pain and anxiety in children.

Her interests include methods of incorporating Integrative Medicine into everyday Pediatric practice in the hospital setting. She will see patients with pain problems and chronic illnesses, as well as those whose families wish to incorporate such modalities as medical aromatherapy, muscle relaxation, and breathing techniques into a healthy lifestyle.

Dr. _____ completed her medical degree at University of _____ School of Medicine. She then completed her residency and a clinical fellowship in Allergy and Immunology at _____. She is currently an Instructor in the Pediatric Allergy, Immunology and Rheumatology division at University of Utah.

Dr. _____'s clinical interests include primary immunodeficiency disease, eczema, and allergies. Dr. _____'s research interests include primary immunodeficiency diseases, with an emphasis in genetics. Her current research focus is in the study of the rare disorder Multiple Intestinal Atresia with Immunodeficiency.

She also has a keen interest in the development of a severe combined immunodeficiency newborn screening program for the state of Utah.
